

Cows on Pasture Need Grain

Large extra summer profits may easily be obtained from cows on pasture. Two pounds of PURINA COW CHOW FEED on pasture will increase the flow of a good producer at least 6 pounds of milk per day, usually more.

At \$2.00 per cwt. the extra milk will bring 12 cents per cow at an extra feed cost of only 7 cents per cow. This means 5 cents extra profit per cow per day or \$1.50 a month. On a herd of 20 cows it would mean an extra profit of \$30.00 per month. These figures are conservative. Make a test. Order PURINA COW CHOW FEED today and start tomorrow.

Repair The Wear

Hard Work Often Breaks Down a Person's Health and Creates a Need for Ziron Iron Tonic.

MEN and women who do hard labor, such as building, farming or housekeeping, and those who do exhaustive brain work of various kinds, often feel the need of something to help renew faded forces and tune up the system.

To help repair the wear caused by overwork, to gain renewed strength and energy, many have obtained good results from taking Ziron Iron Tonic.

Ziron is a perfected preparation of pure medicinal iron salts, combined with other valuable strength-giving

tonic ingredients, which are recommended by leading physicians.

Mr. H. B. Converse, of McEwen, Tenn., writes: "I had been working very hard, and was getting weak and run-down from hard work. When I commenced taking Ziron, in a few days I felt stronger, and now I have taken two bottles I feel as strong as ever, although I have kept at work all the time."

You cannot lose anything by giving Ziron a trial, but very likely will gain much.

Your druggist will sell you the first bottle on a money-back guarantee.

with his rider to the bottom of the sea, but this the jockey would prevent by throwing his weight on the back part of the shell and at the same time pulling the forward part up with his hands, which keeps the animal's head above the surface. By pulling the shell to the right or left, the rider is able to guide his mount, and a circle is made about a boat anchored off shore, and so back to the starting point. These turtles cover a course of eight or nine miles in an astonishing short time.

In Spain is found a particularly warlike fish, and fish fighting is almost a national sport in that country. When a contest is to be staged, two of the fish are placed in a large glass bottle, and these natural gladiators do the rest.

Brazil.

Brazil has a total area of 3,200,431 square miles, and so is 203,612 square miles larger than the United States of America, exclusive of Alaska. The population is considerably more than 25,000,000. The republic is made up of 20 states, one federal district and one territory. Brazil produces 75 per cent of the world's coffee and 25 per cent of the world's rubber.

Primrose Keeps Good Time.

In the garden of Charles D. Emery of Hornell, N. Y., is an old-fashioned English primrose which opens its flowers, Mr. Emery says, promptly at eight o'clock every evening and keeps them open exactly one hour. One evening curfew, which is supposed to ring at nine o'clock, was two minutes early, but the primrose was not fooled. It took the extra two minutes, and folded its petals promptly on the hour, as marked by the stopwatch of an observer.

Power From Small Streams.

Electricity from small streams is the title of a recent publication issued by the department of agriculture. A. M. Daniels, assistant chief mechanical engineer, division of rural engineering, bureau of public roads, is the author. This booklet comprises 20 pages and discusses in their respective order: Latent sources of water power; plants within reach of thousands; estimating the amount of power required; water power principles; measuring the stream flow, and power from small streams.

ODD CONTESTS, OLD AND NEW

Belgium Cock-Crowing Matches and English Lark-Singing Contests—Turtles in Exciting Races.

From the dawn of time man has delighted in contests, whether between individuals who match their strength and skill, or between animals.

Some of these contests are decidedly quaint, or, for instance, the cock-crowing matches of Belgium, where specially bred and trained fowls are matched to see which will crow the greatest number of times within a certain time limit.

The lark-singing contests of England are far more musical, these contests being promoted and conducted by an association having a good membership. The birds are kept for some time in a dark room, and then placed before a mirror in the light. Imagining his own reflection to be a rival, the bird at once bursts into song, a careful record being made of the length of the song.

There used to be in Hamburg a famous collection of wild animals which included a number of giant tortoises, each weighing several hundred pounds. Children would mount upon the backs of these strange steeds, and, holding a lettuce leaf on the end of a stick just beyond the reach of the tortoise, coax them into an amusing race toward a fixed goal.

Much more exciting are the turtle races which may be witnessed in some of the South American countries. Turtle fishers select a number of the great sea turtles, and, attired in bathing costumes, mount their backs, grasping the forepart of the shells with both hands. The turtles are then released and at once make for the sea. Ordinarily the turtle would plunge
